

Work Location: Washington D.C. / Northern Virginia

Candidates need to be local; or be willing to travel to DC or NoVa on a daily basis

Type: Full time employee

Experience Level: 6+ years in Development, 3 years in Oracle's Application Development Framework (ADF)

Clearance: not required

(Senior) Oracle ADF Developer

As a key member of our organization, the candidate will be responsible for ensuring that quality web application development solutions are delivered in a timely manner, at budget, and to our client's satisfaction. This involves working closely with the client to understand and manage their expectations, as well as working closely with Oracle and third-party vendors to architect, develop and ensure solution delivery.

Job Requirements and Responsibilities:

The Sr. Developer will utilize Oracle ADF technologies to develop web applications and integrate with Oracle Business Process Management (BPM) workflows.

Responsibilities: Position requires background in full lifecycle software development including requirements, design, coding, testing and release management.

- Design, implement and perform unit tests for UI and business layer using ADF Faces and Task Flows.
- Integrate with Oracle BPM and BPEL Process Orchestrations.

Required Skills:

- 3 or more years of Oracle ADF experience.
- 5 or more years of Java/ J2EE development experience.
- 3 or more years' experience in developing applications using XML technologies, e.g. XPath, XSLT.
- Should have worked on at-least 3 ADF projects. Should have worked extensively on:
 - Task Flows, ADF Faces, Business Components, ADF Skins / Templates, ADF Security

Desired Skills:

- Experience with Struts, JSTL, Servlets, PL/SQL programming is preferred.
- Experience with HTML, JavaScript and CSS.
- Experience with XML technologies like XSLT, Web Services, SOAP. Conceptual design of database schemas and J2EE applications. Deployment of web applications, security configuration, digital certificates, clustering.
- Experience with the Oracle SOA Suite platform.
- Experience with Oracle 11G Database.
- Competent written and oral communication skills and the ability to engage with colleagues and SME's effectively.
- Ability to work cooperatively with Tech Leads to identifying work completion levels and work remaining.
- Demonstrated ability to manage one's own work and time based on the project plan, assigned tasks and milestones, and direct one's own efforts effectively.
- Self-directed, organized, and motivated.
