

Radus Software Joins the Scaled Agile Partner Network

8/1/2017 Virginia

Radus Software (Radus) announced today that it has joined the Scaled Agile Partner Program as a Gold Partner. This worldwide network includes over 130+ service and tooling providers who help enterprises facilitate and accelerate business results through adoption of the Scaled Agile Framework® (SAFe®).

SAFe is the world's leading framework for enterprise agility. It helps businesses address the significant challenges of developing and delivering high-quality software and systems in the shortest sustainable lead time.

“Working with best-in-class partners like Radus represents our commitment to helping software and systems-dependent enterprises improve time-to-market, quality, and employee engagement,” said Dean Leffingwell, creator of SAFe and cofounder of Scaled Agile, Inc. “By incorporating SAFe into their solution offering, Radus is enabling the world's largest organizations become more Agile in the marketplace and more competitive in their industry.”

About Radus

Since its inception in 2004, Radus has successfully helped enhance federal, commercial and non-profit organizations by helping them better leverage and modernize their existing IT infrastructure and assets. Radus consultants have been helping clients with Portfolio, Program and Project Management Services, Strategic Planning, and IT Lifecycle for over a decade, representing years of accumulated knowledge and experience, gained through several successful engagements, resulting in improved ROI and measurable results. Our consultants have also worked with thought leaders in identifying Value Streams and Value Chains and were very excited to see the use of these principles in the Scaled Agile Framework (SAFe®). We saw the advantage in using the SAFe® framework for large projects very early and we have been helping enterprises with SAFe® implementation since 2015. We have set up a center of excellence to capture and document best practices from various client engagements and mentor our clients through the optimal solution.
