

Radus Software, LLC is a Woman-Owned, Minority-Owned Small Disadvantaged Business (WOSB/MOSB) headquartered in Reston, VA. Since 2004, we have helped federal agencies modernize complex IT environments, implement digital transformation initiatives, and streamline operations through Agile, secure, and data-driven solutions. Our past and current customers include IRS, DOE/NNSA, FAA, DHA, DOT, PBGC, GSA, PBGC, DoD (AF/Navy), and many more.

Radus specializes in Agile/SAFe transformation, cloud and data governance, enterprise architecture, program/portfolio management, and RMF/ATO compliance. Whether modernizing legacy platforms, enabling cloud-native DevSecOps, or aligning strategy with execution, Radus brings the expertise, tools, and mission focus to help agencies deliver with confidence—at the speed of mission.

Metronome (metronomesuite.com) is our flagship Platform-as-a-Service (PaaS), designed to accelerate mission outcomes by unifying requirements, code, compliance, and risk management into one secure environment.

Beyond traditional automation, Metronome enables the rapid development of new mission applications, supports digital twin environments for modeling and simulation, and integrates advanced capabilities such as deepfake detection and AI-driven analysis.

One of the powerful embedded modules, **Metronome Orchestrated Agile**, delivers SAFe at scale, ensuring programs are executed with traceability and compliance built in from the start.

Already ATO'd within DHA and deployable in environments such as AWS GovCloud and Azure Government, Metronome ensures faster delivery, fewer compliance bottlenecks, and greater mission resilience. It creates a durable knowledge base that adapts to rotations and contractor turnover, giving your teams a secure and scalable way to modernize at the speed of mission.

Benefits of using Metronome

- 75% increase in development productivity
- 3.5x faster delivery speed
- 90% decrease in ramp-up time for new developers

Company Overview

- Woman-Owned, Minority-Owned Small Disadvantaged Business (WOSB/MOSB)
- UEI Number: ZJK8PC78NL96
- CAGE: 4SD47
- Q-Level Facilities Clearance

NAICS Codes

- **Primary:** 541511
- **Secondary:** 518210, 541330, 541512, 541513, 541519, 541611, 541618, 561410, 561499, 611420, 611430

Contract Vehicles

- Prime Contract Holder: GSA-MAS (IT) and Navy Seaport NxG
- Access Via Partners
 - GSA 8(a) STARS III (via ANC JV)
 - GSA Oasis+ SB
 - NOAA NMIITS BPA
 - DOT SWES BPA
 - FAA eFAST
 - Army ITES-3S
 - NIH CIO-SP3
 - and many others

Certifications

- CMMI Level III
- ISO 9001

Mission-Focused IT Solutions Provider

Radus Software is a mission-focused IT solutions provider that empowers organizations with secure, Agile, and data-driven transformation. We bring a high-impact portfolio of capabilities tailored to meet your specific operational demands.

- **Strategic Planning:** We help agencies align mission priorities with technology investments through actionable, data-driven planning—ensuring every initiative supports operational readiness and long-term force enablement.
- **Digital Transformation:** We modernize IT environments using SAFe, DevSecOps, and cloud-native technologies, including AWS and Oracle Cloud—essential for Agile and secure digital environments across contested and distributed operations.
- **Agile/SAFe Coaching, Consulting, & Training:** Radus delivers certified Agile/SAFe transformation services, helping government teams adopt lean portfolio practices and continuous delivery—directly enabling speed-to-mission.
- **Program, Project, & Portfolio Management:** Using scorecards and our RPM delivery framework, we drive enterprise-level oversight and execution—key for complex, multi-domain IT portfolios like those within AFSOC.
- **Enterprise Architecture:** We convert strategic guidance into compliant technical roadmaps that prioritize interoperability, zero-trust architecture, and rapid prototyping—critical elements in today's adaptive threat environments.
- **Full Lifecycle IT Implementation (RCSD):** Radus guides solutions from requirements through sustainment using RCSD-aligned methods, emphasizing budget control, risk reduction, and mission alignment across functional domains.
- **Information Governance & Data Management:** We build governance frameworks that enable secure, policy-compliant data usage across enterprises—supporting ISR, logistics, and C2 data flows in joint and coalition environments.
- **Business Intelligence & Performance Measurement:** Through data transparency and performance dashboards, we enable better decision-making that eliminates bias and improves strategic outcomes—an asset for strategic planning and readiness tracking.
- **Cloud Support:** We support mission workloads in AWS and Oracle Cloud—including migrations, security baselining, and cloud-native modernization—tailored for secure environments and FedRAMP controls.

Notable Projects

Self-Service Reporting: Delivered end-to-end technical support for the Individual Master File (IMF)/701 Self-Service Reporting Analysis modernization. Work included application development, modernization of legacy IMF/701 reporting tools, integration with interfacing applications, DevSecOps pipeline support, and program/project management. Provided compliance with IRS Enterprise Life Cycle (ELC), risk management, and stakeholder engagement to ensure continuity and improved taxpayer services.

Enterprise Data Platform Cloud: Migrated 100+ legacy data sources into the IRS Enterprise Data Platform Cloud, leveraging Informatica, Control-M, AWS S3, Databricks Auto Loader, and Python-based ETL pipelines. Provided data engineering, architecture, compliance with IRS security and governance, Agile/OneSDLC project management, and stakeholder engagement. Supported end-to-end delivery across requirements, development, testing, and deployment in a secure, scalable environment.

Coaching & Architecting: Delivered program/project management, Agile/SAFe methodology coaching, business process management, business intelligence & reporting, systems engineering, and enterprise architecture to the Federal Aviation Administration. Supported Oracle Primavera P6 installation and upgrades, BPM, BI Publisher, SharePoint integration, and Independent Verification & Validation (IV&V). Served as a Core Member of the FAA Office of Budget & Programs (ABP) Strategic Advisory Group (PMO Center of Excellence) to develop strategic roadmaps and provide enterprise IT governance.

PaaS Delivery & Support: Provide the Metronome Orchestrated Agile Platform-as-a-Service, ATO'd within DHA and deployable to secure environments (AWS GovCloud, Azure Government). Delivered the platform to support Agile program execution, portfolio management, digital twin simulation (Simulacra), AI-enabled oversight (TrueSight), and RMF/ATO compliance acceleration.

System Modernization: Provide enterprise program and project management system modernization using Oracle Primavera P6 Enterprise Project Portfolio Management (EPPM). Responsibilities include software licensing, system upgrades, infrastructure hosting in secure environments, integration support, and operations and maintenance. Support the Department of Energy/National Nuclear Security Administration's (DOE/NNSA) mission needs for project planning, scheduling, risk management, and compliance.

Training & Digital Transformation: Provided SAFe coaching, Agile training, DevOps and AWS mentoring, and digital transformation support. Helped the Pennsylvania Higher Education Assistance Agency (PHEAA) modernize its IT environment to deliver citizen-centric digital services in a regulated financial services environment.

Integration in Highly Regulated Organizations: Provided technical integration, ADA compliance reviews, program/project management, and business process support. Assisted U.S. Citizenship and Immigration Services (USCIS) in modernizing legacy IT systems and enhancing customer service delivery while meeting DHS security and compliance requirements.

Business Intelligence & Data Management: Supported the Department of Veterans Affairs (VA) IT modernization projects with a focus on program governance, project management, risk management, and ADA compliance reviews. Delivered business intelligence, data management, and program oversight in alignment with VA's digital transformation and service modernization priorities.

This list is partial. Over the past two decades, we have successfully supported a diverse range of clients across DoD, Federal Civilian, SLED, and commercial sectors.

Whether you need a solution to today's toughest challenges or a smarter way to manage products, build secure applications, or modernize your mission systems, Radus Software is here to empower you. With a proven track record across defense, civilian, and commercial sectors, we bring the tools, platforms, and people to help agencies transform complexity into clarity. From synchronized Agile delivery and risk-driven governance to deepfake detection and zero-trust collaboration, Radus delivers mission-aligned innovation at scale.
